

Biological Alternatives Policy

Framework: Green Shield IPM / FAO-WHO | Date: 2024-06-01

Environmental Impact Log

Priority order: prevention, monitoring, biological control, then selective short-residual pesticides only when necessary.

Key commitments:

1. Use *Bacillus thuringiensis* and pheromone traps.
2. IGRs instead of broad-spectrum adulticides.
3. Document justification for any chemical use.

This document supports corporate sustainability audits. Official regulatory requirements may vary by jurisdiction.
