

Site Chemical Footprint Log

Framework: ISO 14001 / GRI Standards | Date: 2025-01-15

Environmental Impact Log

Documents reduction of long-residual pesticides (LRP) at corporate client sites and replacement with biological, low-risk IPM solutions.

Key commitments:

- 1. Monthly pesticide quantity tracking per site.
- 2. Biological vs chemical solution ratio.
- 3. Target 40% annual LRP reduction.

This document supports corporate sustainability audits. Official regulatory requirements may vary by jurisdiction.
