

Non-Target Species Protection Plan

Framework: IPM Institute / Pollinator Protection | Date: 2024-07-01

Environmental Impact Log

Plan to reduce impact on bees, birds, and pets — selective products, secured bait stations, application timing.

Key commitments:

1. No spraying during bloom.
2. Tamper-resistant bait stations.
3. Client education on re-entry intervals.

This document supports corporate sustainability audits. Official regulatory requirements may vary by jurisdiction.
