

Water & Soil Protection Log

Framework: WHO / FAO Environmental Guidelines | Date: 2024-10-15

Environmental Impact Log

Monitors operational impact on groundwater and soil — buffer zones, no spraying near wells, gel baits over spraying.

Key commitments:

- 1. 15m safety distance from water sources.
- 2. Avoid spraying on windy days.
- 3. Crack-and-crevice application preferred.

This document supports corporate sustainability audits. Official regulatory requirements may vary by jurisdiction.
